PREFATORY.

THE MALONEY DIRECTORY CO. present to the citizens of Charlotte and public in general their Charlotte 1897-98 City Directory with the firm belief that in point of information and completeness it will give entire satisfaction and reflect credit upon the city. In the canvas for the names of the citizens we find the nearest average number allowed to each name in the directory to be "three" to the white and three and one half to the colored. We have recorded from A to Z of the general directory (both white and colored) **8,052** names (not including the given name of the wife, which appears only in parenthesis after the name of the husband), which shows that the population of Charlotte, including all suburbs, is **26,153**. Charlotte's future is an assured fact. With its immense wholesale trade, its numerous manufacturing industries, its system of railroads, and its other varied branches of commerce; its substantial, enterprising and honorable business houses, its magnificent business blocks, public buildings and luxurious homes, its beautiful churches of every denomination, its excellent system of public and private schools and colleges, and many other important advantages too numerous to mention here, that go to the making of a great and thriving city, entitles it to the most serious consideration of those who are seeking judicious and careful investment of capital, as a place of business or residence. In conclusion, we beg to return our most cordial thanks to those who have so generously given us their support, and to them we hereby dedicate the work. To the public in general who have so kindly aided us in getting up the data and information we return our acknowledgements. To our patrons and public in general we promise to make each succeeding volume of The Maloney Directory Co.'s Charlotte City Directory more worthy of commendation and patronage.

Respectfully,

THE MALONEY DIRECTORY CO.

JULY, 1897.

THE Hot Springs OF Arkansas.

Owned by and Under the Direct Supervision of the United States Government.

ON April 20th, 1832, the United States Government, by Act of Congress, set apart and dedicated to the people of the United States, 2,560 acres of land at Hot Springs, Ark., as a National Rerservation, not to be entered, located or appropriated for any other purpose than its development into a great American sanitarium of the first rank, where those afflicted with diseases could find relief, and be cared for during their stay in a manner conmmensurate with their condition in life. There were at first many obstacles in the way of a successful accomplishment of this purpose, by no means the least of which was the absence of necessary transportation facilities. The establishment of direct railroad connection with all parts of the country, in 1874, disposed of this difficulty, however, and since that time the development of Hot Springs has been rapid, substantial and even wonderful. In fact this charming resort of the Ozarks, is to-day, the peer of any health resort of the Old World and immeasurably the superior in every respect to any of its American contemporaries.

The pre-eminence of the Hot Springs of Arkansas is due to the following facts:

The unquestioned value of the waters, which is recognized the world over and proven by three-quarters of a century of practical results.

The official endorsement of the United States Government, which owns these springs and, through its properly appointed officials, superintends and directs the distribution of the waters, regulates the method of them, and even fixes the maximum charges for their enjoyment, thereby protecting the people from extortion and placing the means of relief within the reach of everyone. It should be noted also, in this connection, that the Government has erected and maintaines on the Reservation, for the benefit of its invalid soldiers and sailors, the most thoroughly equipped army and navy hospital an the face of the globe. It has also expended, and is now expending, vast sums of money in improving and beautifying the Reservation, transforming the surroundings into a delightful park, with every accessory of beautiful scenery, superb drives and unlimited facility for recreation and amusement.

The matchless climate. Nestled among the foothills of the Ozark Mountains, in latitude 34° 31′ north, and at an altitude of about 1,000 feet above sea level, the climate of Hot Springs challenges comparison with that of any resort in the world. The skies are as clear and beautiful as those of Italy, while the temperature never reaches an extreme in either direction which renders it uncomfortable. The surrounding hills and mountains are covered with a dense growth of luxuriant forest trees, among which the pine largely predominates, its balsamic aroma contributing materially to the purity and healthfulness of the air. It is the home of the mistletoe and the holly.

Hot Springs, Ark., is a thriving, pleasantly located city of about 40,000 inhabitants, including 16,000 resident population, situated near the geographical centre of the State of Arkansas, 410 miles southwest of St. Louis and 65 miles from Little Rock, the capital of the State. Statistics prove it to be the healthiest city in the world, with the lowest average death rate. It is reached quickly and comfortably by rail from every part of the country, and special excursion rates are made to visitors by all American railways. The Iron Mountain Route, in connection with the Hot Springs Railroad Co., runs four daily trains each way, including the Hot Springs Special, carrying reclining chair cars and Pullman sleepers, through without change of cars, leaving St. Louis at 8:37 p. m. and arriving in Hot Springs at 12:40 p. m. the next day; and leaving Hot Springs at 3:00 p. m. and arriving in St. Louis the following morning at 7:00 a. m. The daily arrivals of visitors range from 50 to 250. Any ticket agent will furnish all desired information regarding rates of fare, routes to be used and train service.

Among other features, Hot Springs has seventy-two hot springs, twenty-two bath houses, three banks, best of hotel accommodations, two daily newspapers, nineteen churches, fifteen schools, sixteen livery stables, good markets, numerous retail establishments, active lodges of the leading secret and charitable organizations, the United States Army and Navy Hospital, the United States Government Reservation of 888.7 acres, water works, electric lights and electric street railways, an excellent natural sewerage system, a good fire department and police system, and, in short, everything that goes to make up a modern enterprising town. The business portion of the city is of a substantial and permanent character. Many of the residences compare favorably with those of larger cities, and are pleasing evidences of the wealth and refinement which have found their way to this charming city of the Ozarks.

About the Hot Springs.

The Hot Springs of Arkansas are situated upon the United States Government Reservation, and are under the supervision of the secretary of the interior. They are seventy-two in number, with a temperature of from 96 deg. to 157 deg. Fahrenheit, and a flow of half a million gallons daily.

It is an accepted theory with most practitioners that the wonderful virtue of the waters lies in their natural heat, which seems to possess

peculiar, perhaps magnetic, qualities not characteristic of those of other warm springs or of water artificially heated. For these reasons, this water is not portable, loses its therapeutic qualities entirely when cooled, and is of no value whatever when bottled, either in its natural state or as a basis for patent medicines.

The waters of Hot Springs have been found invaluable in the cure of all forms of rheumatism and gouty conditions, troubles of the stomach, liver and kidneys, skin diseases, diseases of the blood, syphilis, etc., and are especielly efficacious in nervous affections—particularly insomnia, nervous prostration and "la grippe" –in barrenness in women, and in all the various other female complaints, including those consequent upon the change of life.

ABOUT THE BATHS.

Description of the Bath Houses with the Methods and Cost of Bathing.

The bath houses, with few exceptions, are located on the Government reservation park, at the base of the Hot Springs Mountain, and occupy about three ordinary city blocks on Central Avenue. They are of tasteful design, are surrounded by well kept lawns, and are all equipped with porcelain tubs and the best modern appliances. They are supplied by gravity with the hot water from the springs on the mountain above, the distribution being made under the immediate supervision of a superintendent, appointed by the United States government, which has also established rigid directions and regulations for the use of the baths.

Every visitor to Hot Springs takes the baths. If an invalid, he first undergoes a thorough examination by his physician, who issues instructions, according to the requirements of the case, for the guidance of the patient and his attendant. These directions are usually to bathe from six to twenty minutes, with the water at a temperature of from 95 deg. to 100 deg. Fahrenheit, followed by from two to six minutes in the vapor room, and five to twenty minutes in blankets, according to the time required to produce free perspiration. It is never safe for an invalid to use the baths without the advice of some reputable physician, as should there be an affection of the heart or lungs, the result might be harmful. Those visitors who bathe simply as a luxury or for cleanliness, will find the bath house managements sufficiently experienced to regulate the conditions.

An important adjunct to the baths is the drinking of the hot water. It is a well known fact that these waters are the only hot waters in America which can de drunk freely without causing nausea or constipation. This is due to the presence of carbonic acid gas in large quantities, which renders the water palatable and exhilarating and mildly aperient.

The cost of the baths ranges from $5 to $10 per course of twenty-one baths, according to the class of the accommodations furnished by the bath houses selected. The attendant's fees are in all cases 10 cents for a single bath or $1.50 per course, payable weekly in advance. These charges are fixed by the United States government, and any overcharge is illegal and unauthorized and should at once be reported to the superintendent.

Effects of the Baths.

A course of baths at Hot Springs, Ark., opens the pores and channels for the expulsion of matters injurious to health; arouses the torpid and sluggish secretions; stimulates the circulation; purifies the blood, removes aches and pains; drives away rheumatism and paralysis; restores the exhausted; invigorates the enfeebled; revives the debilitated, and helps nature build up and renew the entire system.

A Resort all the Year Round.

Hot Springs is a resort for health, pleasure or sight-seeing at all seasons of the year, and is probably more so than any other waterine place in the world.

The delightful climate and well known efficacy of the thermal waters at all times, make it a pleasant and desirable place of resort at any season of the year. Invalids are needing the beneficial effects of the baths constantly, and cannot wait for a change of seasons, and it is not necessary. Visitors from the northern States who are not really invalids, but who feel the bad effects of the extreme cold winter weather of their native States, flock here in large numbers every winter to escape it, and are more than well paid for so doing. Outdoor exercise and rides can be taken here in the winter months with the same comfort (with an exception of a day or two at a time) as in May or October in the north.

The hotels and boarding houses keep open doors the whole year round (with the exception of the Park and the Eastman); and while it is true that there are favorite seasons when they have more guests than at others, they are beginning to have a goodly number all the year round.

Pleasure parties from the North prefer winter and spring; from the South, summer and fall; but the invalid, like the poor, "we have always with us." So it can be readily seen why this is a resort at all seasons, and it will no doubt continue to be more so every year. It would be extremely difficult to find a more favorable situation for just such a resort. The climate is not subject to either extremes of heat or cold.

Sunstrokes, so common in the North, are unknown here, and the summer nights are always cool and pleasant, enabling the sleeper to rest comfortably and awake in the morning refreshed and invigorated. Sultry nights are almost unknown, sheets and blankets are always in demand before morning. The high elevation, pure mountain air and constant southern breezes account for these blessings. Additional evidence that Hot Springs is a desirable summer as well as winter resort is found in the presence during this season of large numbers of the best Southern people from every section of the South, who select Hot Springs for their summer outing in preference to the resorts farther north. The Arlington Hotel, open the year round, affords ample and luxurious accommodations at any season, and opportunities for amusement and recreation are always presenting themselves.

FURNACES For Churches or Residences a Specialty. All Work Guaranteed.

J. N. McCAUSLAND & CO., Charlotte, N. C.

"An Evolution in Typewriters."

Have you money to burn?
If you have, pay $100.00 for a typewriter

LET ME SAVE YOU $65.00.

Send for a sample of the work done on the

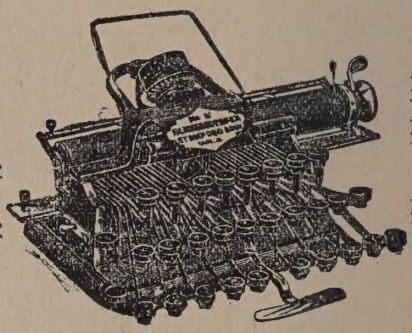
Blickensderfer Typewriter

And compare with that done on any $100 machine.

Its More Rapid.

Its Simpler.

Is Easier to Learn.



Its More Durable.

It Does Better Manifold Work.

Its a BETTER Machine.

PRICE, $35.00.

Send for a copy of "WHAT THEY SAY."

Second-hand machines of all kinds at low prices.
